Mid-assignment submission

3. Short write-up on the basic use cases and your execution plan.
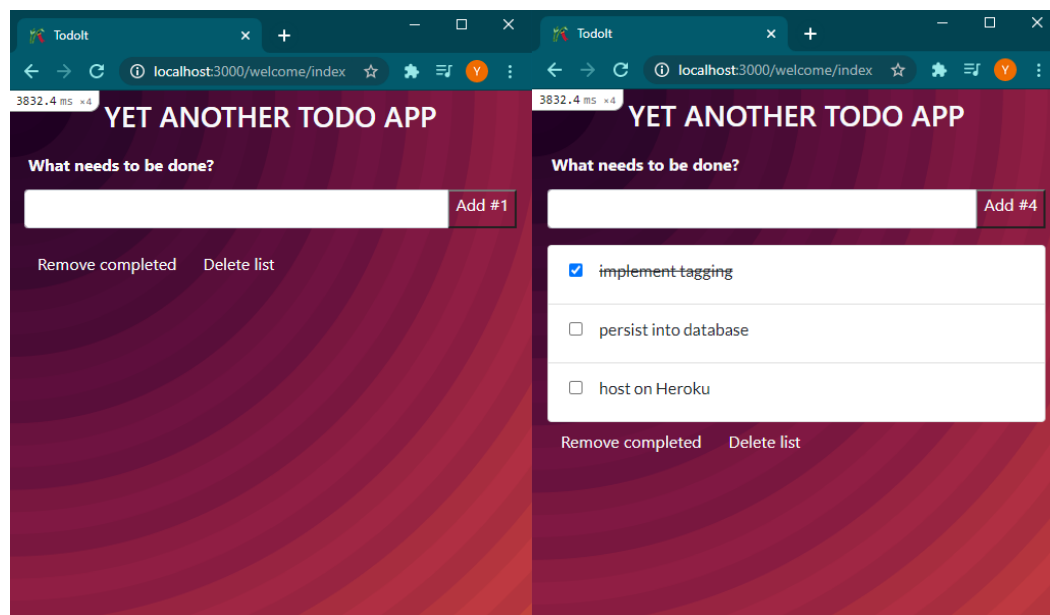

(Current)

Task 1 – Managing Tasks

Users can

- Add new tasks
- Read all created tasks
- Update added tasks as completed
- Remove all tasks marked as completed
- Delete entire list of tasks

(Next steps and execution plan)

- Implement a tagging system where users can create a tag and add tasks under that tag (Task 2)
- Persist data into localStorage
- Persist data into mySQL database
  - Create relevant models
  - Create Restful routes for interaction of front-end with database
- Improve code quality and add relevant CSS
- Host on Heroku/Netlify
